Richard G. Olsen (S'66-M'71-S'72-M'75-SM'80) was born in Colorado Springs, CO, on August 10, 1945. He received the B.S. degree in electrical engineering from the University of Missouri at Rolla in 1968, and the M.S. and Ph.D. degrees in electrical engineering from the University of Utah, Salt Lake City, in 1970 and 1975, respectively.

From 1968 to 1973 he was employed by the Bendix Corporation, Kansas City, MO, where he was engaged in the production support

engineering of electronic subsystems. Since 1975, he has been a member of the Research Staff at the Naval Aerospace Medical Research Laboratory, Pensacola, FL, where he is now Division Chief of the Environmental Assessment Division and the Systems Engineering Division within the Bioenvironmental Sciences Department. His research activities primarily involve microwave and RF bioeffects.

Dr. Olsen is a member of Sigma Xi, Tau Beta Pi, Phi Kappa Phi, Eta Kappa Nu, and Sigma Pi Sigma. He has served as Secretary/Treasurer, Vice-Chairman, and Chairman of the Pensacola Section of IEEE.

James C. Lin (S'65-S'67-M'71-SM'77) was born in 1942. He received the B.S., M.S., and Ph.D. degrees in electrical engineering from the University of Washington, Seattle.

At present he is Head of the Department of Bioengineering, University of Illinois at Chicago, where he also serves as a Professor of Bioengineering and of Electrical Engineering. He formerly held professorial appointments at Wayne State University, Detroit, MI, and the University of Washington. His publications have

appeared in many journals and books, and include the research monograph, *Microwave Auditory Effects and Applications* (Springfield, IL: Charles C Thomas, 1978). He has been a scientific consultant to several private organizations as well as state and federal agencies.

Prof. Lin is a member of the Editorial Board of *Bioelectromagnetics*, the *IEEE TRANSACTIONS ON MICROWAVE THEORY AND TECHNIQUES*, the *Journal of Microwave Power*, and the *Journal of Environmental Pathology and Toxicology*. He has served on the IEEE Committee on Man and Radiation (COMAR), the American National Standards Institute (ANSI) Subcommittee C95.4 (and chairs its Dosimetry Working Group), and the U.S. National Committee for the International Union of Radio Science. He has been a member of the Board of Governors of the International Microwave Power Institute and the Board of Directors of the Bioelectromagnetics Society. He also served on the Governor's Task Force to Review Project Seafarer (Michigan) in 1976. He was the recipient of an IEEE Transactions Prize Paper Award.
